

OXYGEN & ACETYLENE REELS

3/16" TO 3/8" HOSE
SPRING OPERATED REWIND

Standard Equipment

- Positive lock & unlock ratchet (non-sparking)
- Roller guide
- Brass adaptors (LH & RH threads)

American Reels oxygen and acetylene hose reels are designed to store and dispense hoses used in welding and cutting processes. The oxygen and acetylene hoses are typically used together in oxy-acetylene welding and cutting, and they need to be stored properly to prevent tangling and damage.

When selecting an oxygen and acetylene hose reel, it is important to consider the length and diameter of the hoses being used to ensure safe operation and avoid accidents or damage to the equipment.

Our hose reels are designed to keep your hoses organized, easily accessible, and tangle-free. Made of durable materials, these reels can withstand the high pressures and temperatures involved in welding and cutting processes.

Built for professionals, our oxygen and acetylene hose reels will provide a safe and efficient solution for your welding and cutting needs.
